## Explanatory Note

The calculation of the maximum fair rent, in accordance with the formula contained in the Order, is set out above.

In summary, the formula provides for the maximum fair rent to be calculated by:

increasing the previous registered rent by the percentage change in the retail price index (the RPI) since the date of that earlier registration and

adding a further 7.5% (if the present application was the first since 1 February 1999) or 5% (if it is a second or subsequent application since that date).

A 7.5% increase is represented, in the calculation set out above, by the addition of 1.075 to (B) and an increase of 5% is represented by the addition of 1.05 to (B).

The result is rounded up to the nearest 50 pence.

For the purposes of the calculation the latest RPI figure (x) is that published in the month before the Committee's fair rent determination.

The calculation of the maximum fair rent excludes any sum payable under a variable service charge, where the rent is registered as variable under section 71(4) of the Rent Act 1977. In such a case that sum is added to the maximum fair rent in order to produce the rent to be registered as the fair rent.
