MAXIMUM FAIR RENT CALCULATION

LATEST RPI FIGURE x 182.6

PREVIOUS RPI FIGURE y 173.3

x 182.6 minus y 173.3 = (A) 9.3

(A) 9.3 divided by y 173.3 = (B) 0.053664

First application for re-registration since 1 February 1999 YES/NO (delete as applicable)

If yes (B) plus 1.075 = (C)

If no (B) plus 1.05 = (C) 1.103664

Last registered rent* £ 500 Multiplied by (C) = £ 551.83

*(exclusive of any variable service charge)

Rounded up to nearest 50 pence = £ 552

MAXIMUM FAIR RENT = £ 552 Per month

Explanatory Note

- The calculation of the maximum fair rent, in accordance with the formula contained in the Order, is set out above.
- In summary, the formula provides for the maximum fair rent to be calculated by:
 - increasing the previous registered rent by the percentage change in the retail price index (the RPI) since the date of that earlier registration and
 - adding a further 7.5% (if the present application was the first since 1 February 1999) or 5% (if it is a second or subsequent application since that date).

A 7.5% increase is represented, in the calculation set out above, by the addition of 1.075 to (B) and an increase of 5% is represented by the addition of 1.05 to (B).

The result is rounded up to the nearest 50 pence.

- For the purposes of the calculation the latest RPI figure (x) is that published in the month before the Committee's fair rent determination.
- The calculation of the maximum fair rent excludes any sum payable under a variable service charge, where the rent is registered as variable under section 71(4) of the Rent Act 1977. In such a case that sum is added to the maximum fair rent in order to produce the rent to be registered as the fair rent.
