## MAXIMUM FAIR RENT CALCULATION

LATEST RPI FIGURE x 188.6
PREVIOUS RPI FIGURE y 173.1
x $188.6$ minus y $173.1$ = (A) $15.5$
(A) $15.5$ divided by y $173.1$ = (B) $0.089544$
First application for re-registration since 1 February 1999 NO (delete as applicable)
If yes (B) plus 1.075 = (C)
If no (B) plus 1.05 = (C) 1.139544
Last registered rent* £ $52$ Multiplied by (C) = £ $59.26$ *(exclusive of any variable service charge)
Rounded up to nearest 50 pence = £ 59.50
MAXIMUM FAIR RENT = $\begin{array}{c} £ \\ 59.50 \\ +32.84 \\ \underline{£92.34} \end{array}$ Per Week inclusive of variable services

## **Explanatory Note**

- 1. The calculation of the maximum fair rent, in accordance with the formula contained in the Order, is set out above.
- 2. In summary, the formula provides for the maximum fair rent to be calculated by:
  - (a) increasing the previous registered rent by the percentage change in the retail price index (the RPI) since the date of that earlier registration and
  - (b) adding a further 7.5% (if the present application was the first since 1 February 1999) or 5% (if it is a second or subsequent application since that date).

A 7.5% increase is represented, in the calculation set out above, by the addition of 1.075 to (B) and an increase of 5% is represented by the addition of 1.05 to (B).

The result is rounded up to the nearest 50 pence.

- 3. For the purposes of the calculation the latest RPI figure (x) is that published in the month before the Committee's fair rent determination.
- 4. The calculation of the maximum fair rent excludes any sum payable under a variable service charge, where the rent is registered as variable under section 71(4) of the Rent Act 1977. In such a case that sum is added to the maximum fair rent in order to produce the rent to be registered as the fair rent.
